DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a semiconductor control process, classified in class 438, subclass 14.
 - II. Claims 16-21, drawn to encoded program storage medium, classified in class 714, subclass 10+.
 - III. Claims 22-27, drawn to programmed computer, classified in class 707, subclass 1.
 - IV. Claims 28-36, drawn to apparatus for processing, classified in class 428, subclass 255.18.
2. Inventions I and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process. For example, the fabrication tool can be used in a non-semiconductor fabrication process such as pharmaceutical fabrication.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
